Abstract:

The title of the study is "A Study on the Influence of Jupiter on the Prosperity of Obstetricians and Gynecologists". The prosperity of obstetricians is collected and the astrological rules given in astrology for working as a gynecologist are compared and examined in the collected prosperity. The purpose of the study is to examine the influence of Jupiter on the 6th house of disease, the 5th house of childbirth, and the 10th house of career.

Key Words: Jupiter - 5th House - 5th House Lord - 6th House - 6th House Lord - 10th House - 10th House Lord.

Introduction:

Obstetrics is the most important stage of a woman's reproductive cycle. It is basically a medical field that covers pregnancy, childbirth, and the well-being of the mother after childbirth.

Major Divisions and Components of Obstetrics:

- Prenatal care: The main objective is to monitor the health of the mother and fetus from the day of conception until delivery.
 - Routine check-ups: Monitoring the mother's weight, blood pressure, anemia, and diabetes.
 - Diagnostic tests: Taking scans (ultrasound) to monitor the growth and health of the fetus. Early detection of pregnancy complications (e.g., fetal defects, placental problems).
 - Nutrition and education: Providing advice on diet, exercise, and preparation for childbirth during pregnancy.
- Delivery: This is the core part of obstetrics. The obstetrician's job is to manage the mother and baby safely during labor.
 - Labor and delivery: Managing labor pain, supporting the mother, and preventing complications during labor.
 - Cesarean section: Surgical delivery of the baby when complications arise during labor (e.g., breech presentation, maternal health problems, prolonged labor).
 - Pain management: Managing labor pain without medication (e.g., breathing, position changes) or with medication (e.g., epidural anesthesia).
- Postpartum care: Monitoring the physical and mental health of the mother from the moment the baby is born until about 6 weeks after birth.
 - Bleeding and infection: Preventing or treating excessive bleeding and infections after childbirth.
 - Breastfeeding: Providing support and advice for breastfeeding.
 - Mental health: Diagnosing and treating problems such as postpartum depression.

Obstetrician:

An obstetrician is a doctor who is specially trained in the management of pregnancy, childbirth and postpartum complications. Most are trained in both obstetrics and gynecology.

The development of obstetrics in India has gone through several periods. Its main features are as follows:

Ancient Period:

- Ancient teachers: One of the teachers who worked well on obstetrics and pediatrics in ancient Indian medicine was Kasyappa. His successor, Vagbhatta (6th century AD), explained the basic medical aspects of the intricacies of pregnancy and childbirth.
- Traditional medical systems: Traditional systems such as Siddha medicine have emphasized nutritious diet (traditional foods rich in calcium, iron, protein) and lifestyle guidelines for pregnant women to ensure a healthy pregnancy.

Colonial Period and Early Modern Development:

- Social Barriers: In the 1800s, due to some restrictions in society on male doctors attending to deliveries, the need for female doctors increased.
- Beginning of Hospitals: Some special hospitals like Sir. Ramasamy Mudaliar Women's Hospital and Gosha Hospital were started for women and for deliveries in the Gosha method. Vellore Women's Hospital was also started with the aim of providing equal treatment to all.
- Dr. Ida Scutter: Although she was not trained to attend to deliveries, Ida Scutter, the daughter of American missionary Dr. John Scutter, initially understood the needs of women and later played a major role in producing female doctors and nurses through the Vellore Christian Medical College.

Post-Independence and Modern Development:

- Government Schemes: Various government schemes have been started to improve maternal and child welfare and reduce maternal mortality rate and infant mortality rate.

- Dr. Schemes like Muthulakshmi Reddy Maternity Financial Assistance Scheme and Pradhan Mantri Mathru Vandana Yojana help in encouraging pregnant mothers to deliver in hospitals and provide financial assistance for nutrition.
- Welfare schemes like Amma Childcare Gift Box provide essential items to mothers and children after delivery.
- National Child Welfare Scheme helps in detecting and treating birth defects and developmental disabilities in children from birth to 18 years of age.

Modern Medical Technologies:

- Prenatal care: Monitoring the health of the mother and fetus through regular check-ups, ultrasound scans, blood tests and vaccinations has been made mandatory.
- Special Treatments: Specialized centers for managing high-risk pregnancies, use sophisticated techniques such as IVF (intrauterine insemination), (in vitro fertilization) in fertility treatments.
- Minimal Access Surgeries: Laparoscopic and robotic surgeries are used in gynecological procedures such as removal of fibroids, hysterectomy.
- Pain Relief Delivery: Options such as "painless delivery" using pain relief techniques during labor have become common.

Reduction in Maternal Mortality Rate:

- The overall maternal mortality rate in India is gradually decreasing. Particularly, southern states like Kerala and Tamil Nadu have made significant progress in this regard and have met the United Nations targets. This is attributed to the improvement in prenatal care, increase in hospital deliveries and access to emergency obstetric care.
- The history of obstetrics has a long and gradual development across the world, especially in Tamil medical systems. Here are some of the key aspects from early traditional practices to modern hospital care:

Ancient Obstetrics (Traditional and Siddha Medicine):

- Obstetrics in Ancient Tamil Literature: The Sangam literature and the Tirumularan Tirumanthiram contain references to conception, stages of embryo development and childbirth.
- Embryo Development: The Tirumanthiram (461, 462) is surprisingly similar to today's science in that it gives ideas about the fusion of the mother's and father's cells to form a child, and the reasons for male and female birth.
- Childbirth and Maternal Care: The period of pregnancy was called "Chul" and the entire pregnancy was called "Niraichul". The place where the child was born was called "Eenil". After childbirth, it was customary to isolate the mother for a few days ("Puniru Thir Pohudu") for her well-being.
- Ayurveda and Siddha: The ancient Indian systems of medicine, Ayurveda and Siddha, have separate sections for obstetrics and gynecology.
- Kashyapa is considered the master of gynecology and pediatrics in Ayurveda.
- Siddha also deals in detail with women's diseases, conception, childbirth, and traditional foods (lentils, chickpeas) for mothers.
- Midwives: In the middle Ages, obstetricians were called midwives. They were performed by novice women. It was common practice for deliveries to take place at home with the assistance of a midwife.

The Middle Ages and the Early Modern Period:

- Male-dominated maternity hospitals: Until the 1870s, most hospitals were run by male doctors. Female doctors were barred from training.
- First women's hospitals: Hospitals that trained women in obstetrics and were run by women began to emerge. The "New Hospital for Women" founded by Elizabeth Garrett Anderson (which began as a dispensary in the 1770s and was renamed the Elizabeth Garrett Anderson Hospital in 1918) was a major milestone.

Developments in Modern Medicine:

- Obstetrics and Gynecology: Today, obstetrics (pregnancy and childbirth) and gynecology (the health of the reproductive organs of women outside of pregnancy) are considered to be a single integrated medical field.
- Prenatal care: This was a major turning point in obstetrics. Early detection and treatment of pregnancy complications (blood pressure, diabetes, risk of miscarriage) through regular medical visits, blood and urine tests, and ultrasounds has become an essential practice.
- Surgical procedures: Modern surgical procedures such as caesarean section, hysterectomy, and procedures performed using instruments such as laparoscopy and hysteroscopy have become much safer.
- Public health schemes: In India, government schemes such as the Dr. Muthulakshmi Reddy Maternity Assistance Scheme, by providing financial assistance to pregnant women to deliver in government hospitals, have played a major role in reducing maternal and child mortality rates.
- Obstetrics has gradually evolved from ancient beliefs and herbal remedies to modern science, instruments, surgical techniques, and comprehensive prenatal care, improving the health and safety of both mother and child.
- It can be about the advantages and challenges of being an obstetrician. It refers to the challenges and satisfaction aspects of being a medical profession.

Advantages of the Gynecologist Profession Features:

The satisfaction and professional benefits of being an obstetrician are important:

- **High Satisfaction:**
 - Joy of new life: This field is unique in that it offers the rare opportunity to deliver a child and bring joy to the lives of mothers. This is a huge emotional reward.
 - Long-term relationships: A deep bond is formed between doctors and patients, as they build a close, trusting relationship with patients from the beginning of pregnancy until delivery.

- **Broad Medical Skills:**
 - Surgical expertise: Obstetricians are skilled in both minor surgeries (e.g. vaginal delivery) and major surgeries (e.g. caesarean section, hysterectomy).
 - Integrating various disciplines: The ability to simultaneously handle general medical issues such as gestational diabetes, blood pressure, surgical techniques, and women's health issues is available.
- **Stable Career and Income:**
 - High demand: Since childbirth is an essential medical service that is always needed, the demand for obstetricians is always high. It is a safe and well-paying profession.
 - Career growth: There are a variety of job opportunities, whether in clinics, government hospitals, or large corporate hospitals. Also, there are many opportunities to specialize in sub-specialties such as high-risk pregnancies or fertility treatment.

Although being a gynecologist offers immeasurable satisfaction, it is a profession that demands a corresponding amount of dedication, time, and determination.

Medicine and Astrology:

Once upon a time, the word doctor was used in our country instead of the word doctor. Before the arrival of the English medical system, doctors used to identify herbs, roots, vegetables, etc., mature them, mix them in the right quantities, and turn them into medicine to cure diseases and treat people. At that time, a doctor must also know astrology. Because medicinal plants, roots, herbs, etc. should be matured and prepared for medicine by looking at the day, star, and date. They also calculated the day and date stars on which the patient should take the medicine.

- Planets: Each planet is the primary cause of every disease and the indirect cause of some diseases. Among these, good planets keep diseases under control to some extent and make the aspirant function well. Evil planets not only cause diseases but also cause more suffering due to them.
- Zodiac Signs: The nature of the zodiac signs is defined according to Kalapurusha philosophy. Among them, according to Kalapurusha philosophy, Virgo, the sixth zodiac sign, is an auspicious zodiac sign, a land zodiac sign, a female zodiac sign, and a Mercury zodiac sign. Therefore, the diseases that occur to humans come and go, are difficult, and are resolved, and sometimes they produce different results than expected. Therefore, the Kalapurusha zodiac sign should be taken into account to some extent. Generally, the nature of the zodiac sign in which the sixth lord of the evil is located in the zodiac system should be studied well. Because the sixth lord of the evil is the one who has the qualities of the zodiac sign in which he is located. Therefore, the zodiac sign in which the sixth lord of the evil is located is very important.
- Stars: Generally, planets in the stars of malefic planets cause diseases. Planets placed in the stars of good planets cause diseases. Therefore, the stars in which planets are placed are considered important. Out of the twelve bad houses, the 6th, 8th, and 12th bad houses are defined in astrology as causing the most harm. Therefore, the sixth bad house, which is the house of disease, is very important for medical astrology. The position of the sixth bad house, the planets in the sixth bad house, the lord of the sixth bad house, etc. should be mainly assessed. The severity of the disease can be determined using these bad houses. When the eighth bad house is active, it can be determined how the beneficiary will suffer due to the nature of the disease and how death will occur. The action of both the sixth bad house and the eighth bad house in a person's good house can cause very dangerous consequences. Therefore, during these times, the good planets should be associated with the lords of the good bad houses and determine the results. When the twelfth house is active, unnecessary expenses increase and the person suffers. Generally, when the sixth house is active, if the 12th house is also active, there will be benefits such as staying in the hospital for a long time, increasing medical expenses, and being afraid and upset due to illness. If good planets and good lords are in contact, there will be freedom from illness and expenses. Thus, medicine and astrology worked together in those days. But with the scientific development that occurred in the last century, the English system of medicine, allopathy, has become famous worldwide. Medicine and surgery have revolutionized the modern world. Therefore, this course has also gained great popularity worldwide. Even in our country, the need and interest in medical education is constantly increasing. If one wants to become a doctor, one must pass the entrance examination for medical education, complete medical education, and then serve as a doctor. Thus, in order to pass the entrance examination, successfully study medical education, join the job, and serve as an obstetrician, the planetary systems should be favorable. According to the astrological rules for working as a gynecologist, one can see in detail what kind of planetary arrangement is in one's favor.

Importance of Planets:

For a person to become a Gynecologist, Jupiter should be in a strong position in his horoscope.

- Jupiter: Medicine; Jupiter is the karaka of stomach, children, wealth, wisdom, knowledge and studies. Therefore, Jupiter should be very strong in the horoscope of a gynecologist.

Bavas:

Some of the Bavas in the horoscope indicate the medical profession.

- 10th house: This is the place where one represents career, work and social status. To become a gynecologist, this house should be very strong.
- 6th house: This indicates illness, enemies and debts. Treatment through gynecology falls under the karakatva of this house. Therefore, it is necessary for a gynecologist to have a strong 6th house.
- 5th house: Indicates stomach, children, wealth, wisdom, intellect, knowledge and studies. It is necessary for medical education to be strong. The connection of this house is necessary for an obstetrician.

Astrological Rules for Obstetricians:

Rule Number 1:

Jupiter is in connection with the 5th, 6th, and 10th houses. This is considered a very good arrangement for becoming an obstetrician.

Explanation of the Rule:

- Jupiter is in the 5th, 6th, and 10th houses or Jupiter's aspects 5, 7 & 9 the 5th, 6th, and 10th houses.
- Jupiter is in conjunction with the lords of the 5th, 6th, and 10th houses or Jupiter's aspects 5, 7 & 9 the lords of the 5th, 6th, and 10th houses.
- The 5th, 6th and 10th houses become Jupiter's own house - Sagittarius or Pisces zodiac sign.
- The lords of the 5th, 6th, and 10th house are in the star essences of the Jupiter stars Punarpoosa, Visakha, and Pooratathi.

Rule Number 2:

The lords of the 5th, 6th, and 10th house are in contact with each other. The contact of these lords increases the chances of becoming a gynaecologist.

Explanation of the Rule:

- The lords of the 5th, 6th, and 10th house are in conjunction.
- The lords of the 5th, 6th, and 10th house are in aspects each other with each other.
- The lords of the 5th, 6th, and 10th house are in standing among their own starts each other.

These planetary arrangements may give a person the interest, ability, and opportunities for success in the medical field.

Let's Take a Look at Some Examples of Horoscopes:

Number: 001

Date of Birth: 28.11.1979

Time of Birth: 08.40 PM

Place of Birth: Coimbatore

Moon			Asc
Keth	Rasi		
			Mar Rag Jup
Ven	Sun	Mer	Sat

	Asc	Mer Ven	
	Navamsam		Mar Rag
Keth Sat			Jup Moon
		Sun	

This example is based on the following rules

According to Rule Number 1:

- Venus, the lord of the 5th house, is in the house of Jupiter, the house of Dhanush, and Jupiter aspects Venus as its 5th aspect.
- Mars, the lord of the 6th house, is in conjunction with Jupiter.
- Pisces, the lord of the 10th house, Jupiter aspects Pisces, the house of Jupiter, the lord of the 10th house, and Jupiter, the lord of the 5th house, acquires the essence of Venus, the lord of the 5th house.

According to Rule Number 2:

- Venus, the lord of the 5th house, is in the house of Jupiter, the lord of the 10th house, and Jupiter, the lord of the 10th house, acquires the essence of Venus, the lord of the 10th house, and combines with Mars, the lord of the 6th house.
- Mars, the lord of the 6th house, is in conjunction with Jupiter, the lord of the 10th house,
- Jupiter, the lord of the 10th house, acquires the essence of Venus, the lord of the 5th house, and combines with Mars, the lord of the 6th house.

Number: 002

Date of Birth: 01.08.1988

Time of Birth: 04.54 PM

Place of Birth: Trichur

Moon Mar		Jup	Ven
Rag	Rasi		Sun Mer
			Keth
Asc Sat			

Rag	Sat Jup		
	Navamsam		Moon
	Sun Mer Mar	Ven Keth	Asc

This example is based on the following rules

According to Rule Number 1:

- The lord of the 5th house, Mars, is in the house of Jupiter, Sagittarius.
- Jupiter is in the 6th house.
- Jupiter aspects the 10th house as its 5th aspect.

According to Rule Number 2:

- The lord of the 5th house, Mars, is in the 10th house as its 7th aspect.
- Venus, the lord of the 6th house, receives the essence of the lord of the 5th house, Mars.

Number: 003

Date of Birth: 11.08.1991

Time of Birth: 07.18 PM

Place of Birth: Coimbatore

			Keth
Asc	Rasi		Sun Jup
Sat			Moon Mar Ven Mer
Rag			

Jup Sat		Keth	
Sun	Navamsam		Ven Mer
			Moon
	Asc Rag	Mar	

This example is based on the following rules

According to Rule Number 1:

- Jupiter is in the 6th house and Jupiter aspects the 10th house as its 5th aspect
- According to rule number 2
- Mercury, the lord of the 5th house, is in conjunction with Moon, the lord of the 6th house and Mars, the lord of the 10th house.
- Moon, the lord of the 6th house, is in conjunction with Mercury, the lord of the 5th house and Mars, the lord of the 10th house.
- Mars, the lord of the 10th house, is in conjunction with Mercury, the lord of the 5th house and Moon, the lord of the 6th house.

Number: 004

Date of Birth: 26.07.1997

Time of Birth: 02.53 PM

Place of Birth: Trichy

Sat	Moon		
Keth	Rasi		Sun
Jup			Ven Mer Rag
	Asc		Mar

		Moon Mer	Ven Keth
Sat	Navamsam		
			Mar Jup
Asc Rag			Sun

This example is based on the following rules

According To Rule Number 1:

- The 5th house is in Pisces, the house of Jupiter
- The Jupiter aspects the 6th house lord Mars as its 9th aspect
- The Jupiter aspects the 10th house lord Sun as its 7th aspect

According to Rule Number 2:

- The Jupiter aspects the 5th house lord Mars, the 6th house lord Mars, the 6th house lord Jupiter aspects the 5th house lord Mars, the 9th aspect
- The Jupiter aspects the 10th house lord Sun, the 5th house lord Jupiter aspects the 7th aspect.

Number: 005

Date of Birth: 26.09.1994

Time of Birth: 08.40 AM

Place of Birth: Chennai

	Keth		
Sat	Rasi		Asc
			Moon
	Jup Mar Ven	Sun Rag Mer	

	Moon Keth	Mer Sat	Sun
Jup Mar	Navamsam		
Ven			
Asc		Rag	

This example is based on the following rules

Rule Number 1:

Jupiter is placed in the 5th house; Jupiter is placed in the 6th house, which is the house of Jupiter; Mars, the lord of the 10th house, is in conjunction with Jupiter.

Rule Number 2:

Jupiter, the lord of the 6th house, is in conjunction with Mars, the lord of the 5th and 10th houses.

Number: 006

Date of Birth: 20.06.1991

Time of Birth: 10.03 AM

Place of Birth: Salem

			Sun Mer Keth		Asc Sat	Keth	Moon
	Rasi		Mar Ven Jup		Navamsam		
Sat			Asc	Mar			
Rag			Moon	Ven Mer Jup	Sun Rag		

This example is based on the following rules

Rule Number 1:

- The fifth house is in the house of Jupiter, Sagittarius
- Jupiter aspects Saturn, the lord of the 6th house, as its 7th aspect
- Mars, the lord of the 10th house, is in conjunction with Jupiter

Rule Number 2:

- The lord of the 5th house, Jupiter, and the lord of the 6th house, Saturn, are in equal aspect. The lord of the 5th house, Jupiter, and the lord of the 10th house, Mars, are in conjunction.
- The lord of the 6th house, Saturn, and the lord of the 10th house, Mars, are in equal aspect.
- The lord of the 10th house, Mars, and the lord of the 5th house, Jupiter, are in conjunction and the lord of the 10th house, Mars, and the lord of the 6th house, Saturn, are in equal aspect.

Number: 007

Date of Birth: 20.06.1991

Time of Birth: 10.03 AM

Place of Birth: Salem

	Moon Mar Keth	Sun	Asc Mer Ven	Sat		Asc Ven Moon	Rag
Sat	Rasi				Navamsam		Sun
				Jup Mer			Mar
		Jup Rag		Keth			

This example is based on the following rules

Rule Number 1:

- Juru is in the 5th house and the lord of the 5th house aspects Venus, the lord of the 5th house, and Venus, the lord of the 5th house, takes on the essence of Jupiter.
- Juru is in the 6th house aspects Mars, the lord of the 6th house, as his 7th aspect.
- Juru is in the 10th house, which is the house of Jupiter.

Rule Number 2:

- Juru is in the 10th house aspects the lord of the 5th house, and the lord of the 5th house aspects the lord of the 10th house.
- Juru is in the 10th house aspects the lord of the 6th house, as his 7th aspect
- Guru is in the 5th house, and the lord of the 10th house aspects the lord of the 6th house, as his 7th aspect.

Number: 008

Date of Birth: 24.03.1994

Time of Birth: 03.11 AM

Place of Birth: Bangalore

Sun Ven		Keth			Mar	Jup	Asc
Sat Mer Mar	Rasi		Moon		Ven	Navamsam	
Asc				Sat Moon Mer Keth			Rag

	Rag	Jup						Sun
--	-----	-----	--	--	--	--	--	-----

This example is based on the following rules

Rule Number 1:

- Venus, the lord of the 5th house, is in Jupiter's house, Pisces.
- Jupiter aspects the 6th house as its 9th aspect and Mercury, the lord of the 6th house, is in Jupiter's 5th aspect.
- Jupiter aspects the 10th house and Venus, the lord of the 10th house, is in Pisces.

Rule Number 2:

- Venus, the lord of the 5th house, is in aspect with Mercury, the lord of the 6th house.
- Venus, the lord of the 10th house, is in aspect with Mercury, the lord of the 6th house.

Number: 009

Date of Birth: 26.12.1991

Time of Birth: 01.53 AM

Place of Birth: Ariyalur

Asc			Keth		Sat		Ven
	Rasi				Navamsam		Sun
Sat				Jup Moon			Asc Rag
Sun Rag	Mar Mer	Ven		Mer	Jup		Moon

This example is based on the following rules:

Rule Number 1:

- The Moon, the lord of the 5th house, is in conjunction with Jupiter.
- Jupiter is in the 6th house and Jupiter aspects the Sun, the lord of the 6th house, as his 5th aspect.
- The 10th house is in Sagittarius, the house of Jupiter, and Jupiter aspects the 10th house, as his 5th aspect.

Rule Number 2:

- The Moon, the lord of the 5th house, is in conjunction with Jupiter, the lord of the 10th house.
- The Sun, the lord of the 6th house, is in conjunction with Jupiter, the lord of the 5th house.
- The Sun, the lord of the 10th house, is in conjunction with Jupiter, the lord of the 5th house, as his 6th aspect.
- The Jupiter, the lord of the 10th house, is in conjunction with Jupiter, the lord of the 5th house, as his 6th aspect.

Number: 010

Date of Birth: 24.03.1994

Time of Birth: 03.11 AM

Place of Birth: Chennai

Keth Moon Sat Sun Ven	Mer						Asc
	Rasi				Navamsam		Mer Jup
Jup				Mar			Keth
		Asc	Rag	Sat	Mar	Moon	

This example is based on the following rules:

Rule Number 1:

- The lord of the fifth house, Saturn, is in the house of Jupiter, Pisces.
- The lord of the sixth house, Jupiter, is in the house of Jupiter, Pisces.
- The lord of the tenth house, Jupiter, is in his seventh aspect, and the lord of the tenth house, Moon, is in the house of Jupiter, Pisces.

Rule Number 2:

- The lord of the fifth house, is in the sixth aspect.
- The lord of the tenth house, is in the sixth aspect, and the lord of the sixth house, Jupiter, is in the tenth aspect.

Conclusion:

The study titled “A Study on the Influence of Jupiter on the Prosperity of Obstetricians” collected and analyzed the pros of obstetricians. As a result of the study, two rules in astrology are the main reasons for one to work as an obstetrician. They are Rule No. 1: Jupiter is related to the 5th, 6th, and 10th houses. Rule No. 2: The lords of the 5th, 6th, and 10th houses are related to each other. According to the above rules, Jupiter plays a karakam for a person to work as an obstetrician, so it is known through this study that Jupiter plays an important role in the pros of obstetricians.
